

Vision for technology

How technology fits into the big picture
Is digital/web/technology represented at a senior level?
Is innovation and change part of the organisation's mentality?

Future thinking

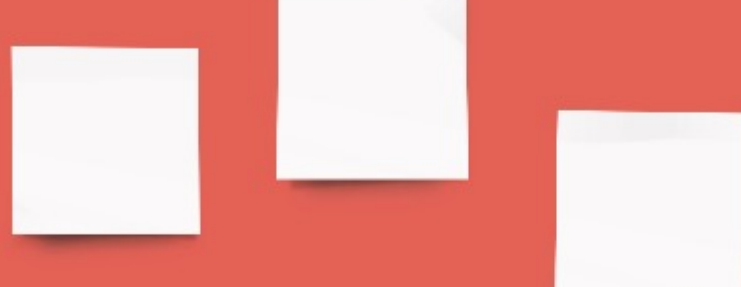

Is there a roadmap for the future, and a strategy around change?
Does leadership support change?
Awareness of evolving societal tech trends and expectations?
Is there a process around investigating new technologies?

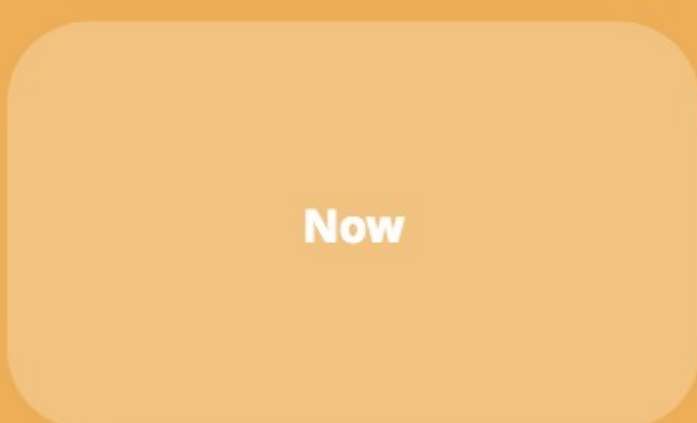

Thinking

Technology selection

What's the process for this?
Who's responsible?
What has and hasn't worked?

Key projects happening

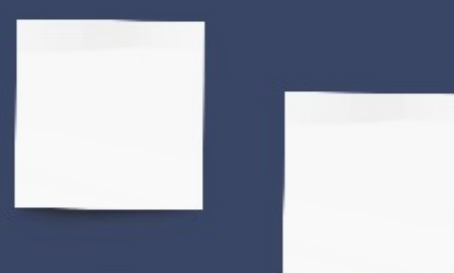

Doing

Known challenges

Known opportunities

How projects run

New features, changes, bugs - process, responsibilities
Internal tools vs public facing
Reviews of errors/logs
Documentation and supporting tools

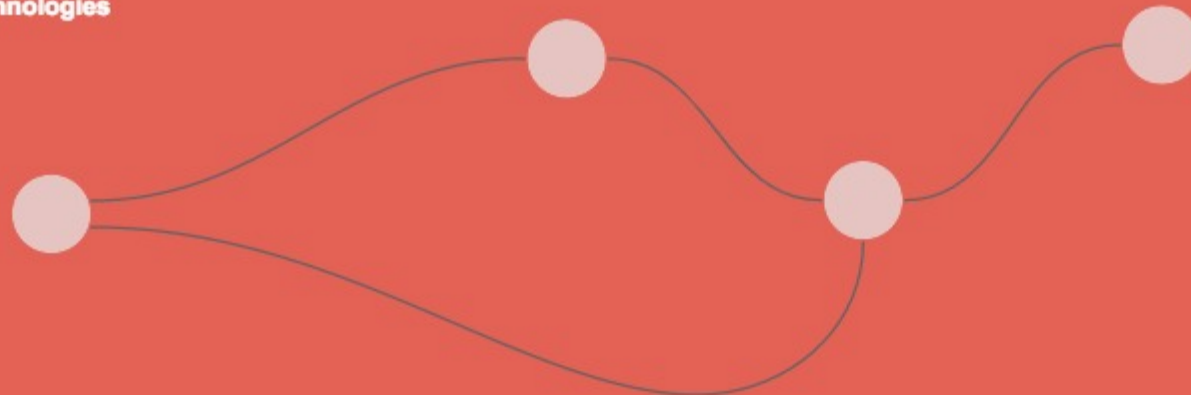

Teams

Roles, responsibilities
Relationships
Numbers

Technology ecosystem

Cornerstone and fringe technologies

How

Key software/ functions

Front-end, back-end, serverless...

Dev env, tooling, hardware

Day-to-day, remote, testing devices

Infrastructure

Data

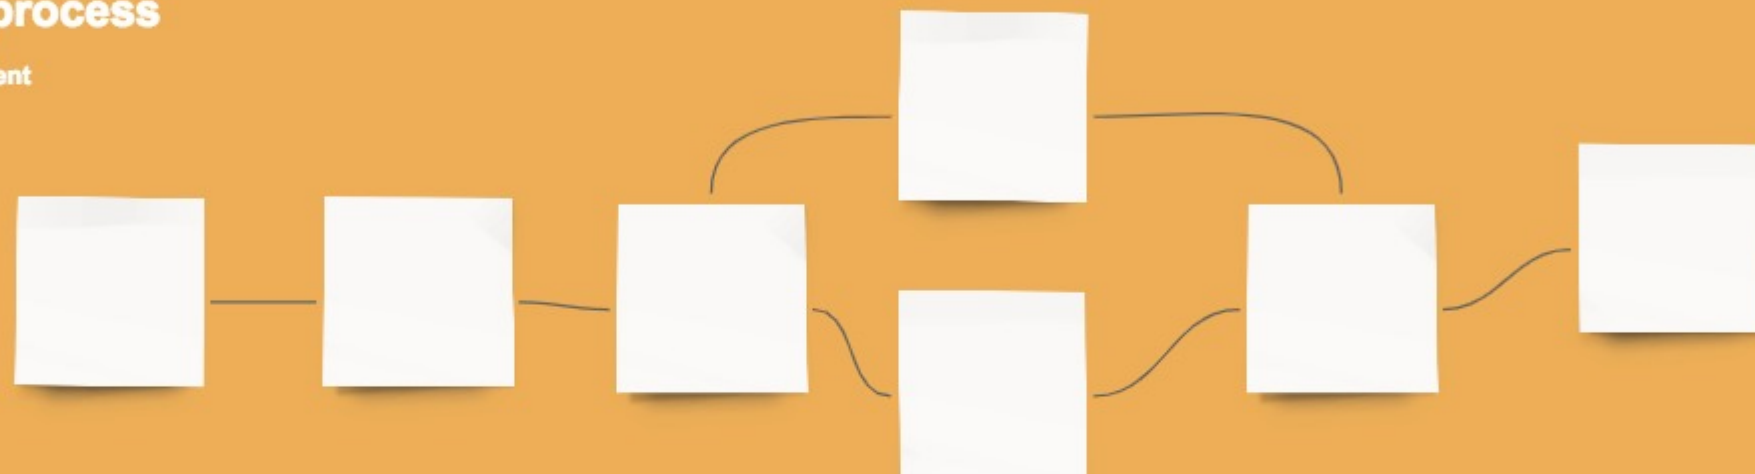

Non-technology/ digital

Deployment process

Source code management
Deployment
Automation
Orchestration
Testing
Monitoring

Accessibility

Performance

Beliefs

Standards and principles

For technology
For people

Re-use and efficiency

Technology culture

Bringing people in
Ongoing learning
Diversity
Ethics
Goal setting
Open/shared
Working environment
Remote options
Physical and mental health
